Email : apiwat2418@gmail.com

Address : Surat Thani Province, 84270

CAREER OBJECTIVE

Developer Engineer with hands-on experience building factory-focused software, real-time machine monitoring dashboards, maintenance systems, Arduino-based IoT data acquisition, automation interfaces, and AI inspection tools. Strong background in electrical/mechanical engineering, IoT, web application development, database design, MQTT/InfluxDB/MSSQL data flow, CI/CD, and PM2 deployment. Able to translate factory pain points into practical digital systems that improve visibility, reduce manual work, support paperless operation, and help production teams make faster decisions.

EXPERIENCE

Aug 2023 – Present **NMB-Minebea Thai Ltd (Developer Engineer)**

- Designed and developed ROS-based automation systems (AGV, Robot Arms) aligned with Industry 4.0 standards
- Applied **AI-based Machine Vision** to enhance inspection accuracy, reduce manpower, and decreasing defect rate (NG).
- Developed **digital production support applications** (maintenance, job request, master job control) to optimize manufacturing operations.
- Implemented **end-to-end smart factory solutions**, including real-time **Machine Monitoring Systems (MMS)** and dashboards for data-driven decision-making.
- Led **technology adoption and technical training** to enable effective use of AI and automation within the organization.

Sep 2021 - Aug 2023 **Kubota Research & Development Asia Co.,Ltd. (IoT Engineer)**

- Conducted **market feasibility studies** and designed new agricultural product concepts.
- Planned and executed **agricultural product development** with partners.
- Applied **IoT technologies** to develop smart agricultural machinery.
- Performed **performance testing and validation** to ensure product quality.

May 2019 - Dec 2019 **Phoenix Pulp and Paper Plc Ltd. & EN KKU (Facilitator)**

- Mentored and facilitated soft & hard skills training for over **15** employees, enhancing their operational efficiency and independent problem-solving capabilities.
- Supported **factory problem-solving**, empowering employees to think and resolve issues independently.
- Supervised and coached participants throughout the project.

EDUCATION

2019 - 2021 **Master of Engineering in Mechanical Engineering, Khon Kaen University**

- Thesis: **System Identification and Inner-Loop Stability Control for Fixed-Wing UAVs using Meta-Heuristics**. (Academic Achievement: Excellent).

2015 - 2019 **Bachelor of Engineering in Electrical Engineering, Khon Kaen University**

(GPA: 3.35, Second Class Honors).

QUALIFICATION

Ability to work under pressure
Teamwork and communication

Self-motivated with continuous learning mindset
Actively keeping up with new technologies

English communication is good
Strong interpersonal skills

TECHNICAL / SOFTWARE SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST API, WebSocket/Socket.IO, FastAPI

Database: SQL Server, PostgreSQL, Prisma ORM, InfluxDB, relational schema design

Factory / IoT: Arduino data acquisition, MQTT, TCP, machine signal input, OEE, machine status, real-time dashboards

DevOps: Git, GitHub Actions CI, Docker, Linux Server, PM2, unit testing, E2E, deployment workflow

AI / Automation: Python, YOLO, machine vision, abnormal detection, ROS, AGV, robot arm control
